

Test stand engineering

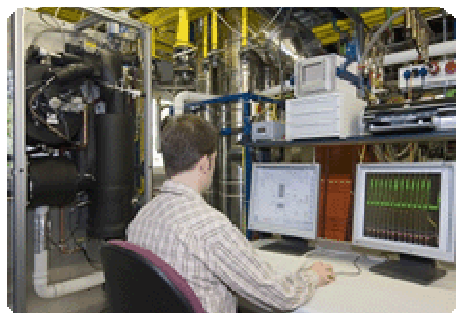

Custom-tailored and turnkey

Test stand for EGR cooler modules

Test stand solution for MCFC-stacks

On-site support

EUtech Scientific Engineering

EUtech Scientific Engineering designs and builds custom tailored test stands to meet the most challenging test requirements. Our customers hail from diverse industries such as automotive, aerospace, heat & power generation and the fuel cell industry.

Turnkey test stand engineering

Our vast experience uniquely qualifies us as a highly competent provider of advanced test system technology. Ranging from single component tester or prototype system to complete test field applications - we got the right solution for your problem - turnkey.

Data management

Data management is a key factor for successful product development and manufacturing. We offer modular data management solutions to help you manage your entire system data. This includes data acquisition, efficient data storage and retrieval as well as advanced post processing functionality.

Instruction & Training

We take care that your engineers have a thorough understanding of how to operate our test stand solutions before we hand them over, so that you can be sure to make full use of your new asset.

Service & Maintenance

Our systems are designed to last for a long time. We help you to maintain the value of your asset by providing attractive service and maintenance packages.
